dublinpaw@mail.remind.com

If you have questions you can call Lt. Keith Moon at  
478-296-1011 or email at moonk@dlcga.com.

## DUBLIN POLICE DEPARTMENT BUSINESS WATCH

A cooperative effort between the Dublin Police  
Department and local businesses to share,  
distribute, and gather information.

Dublin Police Department 478-277-5023

---

## What is Business Watch

Business Watch is an initiative of the Dublin Police Department that shares information with businesses pertaining to the prevention and/or identification of crimes. When the department has information that we think may be of help to local businesses we disseminate that information.

We use readily available software to send out information to a multitude of participants in order to prevent or solve crimes. We can also inform businesses of any classes that the department may be offering that would benefit businesses.

## How does it work?

We use a software program called "Remind101" to push information out to businesses. This program sends one way information by text message or email.

## Can I send information back by using "Remind101"?

No. If you have information of a crime you need to call 911 so that an officer can be dispatched. If you have information that is not time sensitive or critical you may call the main number of the police department (478-277-5023) or 911 between the hours of midnight and 8 AM).

## How often will I receive text or emails?

The frequency you receive information would be determined by the amount of information the department determines to be credible for business. You may receive several one week and no messages for several weeks. The department will be sensitive when sending out information.

## I do not want to get text messages.

You can also join by email.

## I want more information.

You can email "[remind101@dlcga.com](mailto:remind101@dlcga.com)" or call 478-296-1011 if you have any further questions.
